## Profile Summary

- Software Engineer with over 2.5 years of experience, specializing in development, server-side management, automation, API creation, and workflow optimization.
- Successful in developing, debugging, and delivering scalable solutions in Agile environments.

## Skills

**Programming Languages:** Python | JavaScript | C# | SQL  
**Frameworks:** Django | FastAPI | .Net | .Net Core | ASP.Net | ASP.Net MVC  
**Technologies & Tools:** PyTest | PyQt5 | MongoDB | Docker | Pandas | Regex | File Handling | Pytest | Postman | Web-Scraping | Matplotlib | Figma | Wordpress | HTML | CSS | Git.

## Work Experience

### Anora, Chennai

#### Engineer L1

Apr 2023 - Aug 2024

- Designed and Crafted a PyQt5 desktop application for testing automation, leading to a 40% reduction in user errors and a 50% improvement in test execution speed, significantly enhancing user interaction and process efficiency.
- Optimized data workflows using pandas and Agile methodologies, which improved data handling across multiple systems, reduced errors by 25%, and accelerated project delivery by 20% through better collaboration and flexibility.
- Scripted the automation of Fusion to 93k code conversion, utilizing regex pattern matching to separate serial and parallel vectors and assign them to respective pins, increasing conversion accuracy by 35%.

#### Trainee Engineer

Jun 2022 - Mar 2023

- Formulated 50+ API endpoints with CRUD operations, integrating MongoDB for device data storage, enabling real-time device interaction, user authentication, and frequency configuration, which improved data retrieval speeds by 40% and system scalability by 25%.
- Identified and resolved 50+ critical bugs through extensive debugging and root cause analysis, enhancing system stability by 40% and minimizing production issues, significantly improving application reliability and user experience.
- Planned and Developed 100+ test cases with pytest, improving test coverage by 25% and reducing execution time by 30%. Streamlined API testing and authentication using Postman, optimizing 15+ endpoints, increasing performance by 20%, system stability by 35%, and cutting critical bugs by 50%.

#### Graduate Engineer Trainee

Mar 2022 - May 2022

- Built and optimized web applications using C#, ASP.NET Core, and SQL Server, improving system performance by 30% and reducing query execution time through efficient database management with SQLite and SQL Server.
- Deployed applications on Microsoft Azure and implemented CI/CD pipelines using GitHub, enhancing scalability, reliability, and automation. Streamlined backend services in .NET Core, resulting in a 20% boost in project efficiency.

### TAW - T.Abdul Wahid Tanneries, Vellore

#### Web Developer - Freelancer

- Developed a comprehensive website using React, HTML, CSS, and JavaScript, successfully meeting client requirements and enhancing functionality by 40%.
- Managed the end-to-end project process, coordinating with a team to deliver on time, resulting in a 30% increase in client satisfaction and repeat business.

## Education

### SRM Institute of Science & Technology, Chennai

Jun 2018 - Jun 2022

B.Tech in Electrical and Electronics Engineering

Graduated from SRM Institute of Science and Technology, a top 500 global engineering institution.

## Other Details

- **Visa Status:** UAE Visit Visa
- **Notice Period:** Immediate
- **Language Skills:** English, Urdu, Tamil, Hindi, Arabic(Basic).
